## 1. Integration Overview

This integration document will cover the followings:

- REST API (All Products)
- REST API (Product Specific)
- Game Launch
- REST API (Merchant/Operator side)

Each merchant/operator will be given a MIF (Merchant Integration Form) & MBK (Merchant Boarding Kit) that contains all information including:

- URL for API,
- URL for BackOffice
- Client Name
- Merchant code etc

that can be used for integration.

For security reason, incoming access to the environments is restricted by IP addresses. Therefore, merchants/operators are required to provide their IP addresses.

### 1.1 Definitions, Acronyms & Abbreviations

Term	Definition
Merchant/Operator	IMOne customer that is integrated with IMOne system and own Players. The term of Merchant and Operator are used interchangeably in this document.
Member/Player	Customer of the Merchant/Operator and end user of the IM Lobby and Games. The term of Member and Player are used interchangeably in this document.
Provider	3rd party provider of game content that is integrated with the IMOne system.
IM	InplayMatrix.
PT	PlayTech.

### 1.2 Global Responses

The following responses are being used in all API calls in Section 2, 3 and 4.

Respond Code	Respond Message	Remarks
0	Successful.	Successful response will return this response code.
500	Invalid Merchant or Reseller Code.	This response code is returned if a merchant or reseller code doesn't exist in IMOne system.
501	Unauthorized access.	If one merchant's IP hasn't been white-listed and try to call IMOne API, the REST API will return this response code.  Also, if one merchant is trying to change or retrieve the information of players that belongs to another merchant, the REST API will return this response code.
505	Required field cannot be empty or null.	This response code is returned if the required field is empty or null.
538	Setup in progress. Please contact support.	This response code is returned if the integration setup has not completed yet.
600	Provider Internal Error.	This response code is returned if provider returned any general error code that doesn't map with specific IMOne response code.
601	Unauthorized product access.	This response code is returned if one merchant doesn't subscribe to the product.
612	Invalid Argument.	This response code is used for other exception handling. Eg, this response code is returned if provider is unable to accept the parameter value that passed in.  Please trigger IT support if this response code is received.
998	System is currently unable to process your request. Please try again.	Please resend the request if this response code is received.
999	System has failed to process your request.	Please trigger IT support if this response code is received.

**Sample Response:**

```
{
  "Code": 500,
  "Message": "Invalid Merchant Code."
}
```

**1.3 Concurrent Call Limit**

Each Merchant/Operator is limited for concurrent request at the same time **for each product type**:

- i. Up to **6** concurrent requests for each of the following APIs:
  - Get Bet Log (refer section 2.6)
  - Get Bet Log (IM Sportsbook, IM Esports) (refer section 2.6.1)
  - Get BetFlow (refer section 3.5)
  - PT Product Report (refer section 3.20)
- ii. Up to **3** concurrent requests for for any of the following APIs (or combination of them):
  - Get GameStats (refer section 3.4)
  - Product Report (refer section 3.9)
  - Daily Product Report (refer section 3.10)
  - Get Adjustment Log (refer section 2.7)

Each Reseller is limited for concurrent request at the same time **for each product type**.

- i. Up to **6** concurrent requests for each of the following APIs:
  - Get Reseller Bet Log (refer section 2.6.2)
  - Get Reseller Bet Log (IM Sportsbook, IM Esports) (refer section 3.4.1)
  - Get Reseller BetFlow (refer section 3.5.1)
- ii. Up to **3** concurrent requests for for any of the following APIs (or combination of them):
  - Get Reseller GameStats (refer section 3.4.1)
  - Reseller Product Report (refer section 3.9.1)
  - Reseller Daily Product Report (refer section 3.10.1)

When concurrent requests limit have been reached, and none of them have received response from IMOne, Response Code 520 (Transaction is being processed by IMOne system) will be returned when another request is sent. As soon as any one of the requests has received response, the next request can be sent.

## 2. REST API (All Products)

This section outlines all API calls, parameters and responses. These APIs are applicable to all products (except specify otherwise in Remark).

### 2.1.1 Create New Player

This API is called to register a new member/player.

URL: POST Player/Register

#### Input

```

{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "PlayerId": "myPlayerId",
  "Currency": "CNY",
  "Password": "mypassword",
  "Country": "CN",
  "Sex": "M",
  "BirthDate": "19701128"
}
  
```

Property Name	Description
---------------	-------------

MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>• Player's login ID.</li> <li>• It's a required field.</li> <li>• String (25)</li> <li>• Player ID length must be between 5-25 characters long.</li> <li>• Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
Currency	<ul style="list-style-type: none"> <li>• It's a required field.</li> <li>• String (3)</li> <li>• Accepted Currency codes (subject to provider supported Currency, refer Appendix B): CNY, USD, EUR, JPY, MYR, IDR, VND, THB, KRW, CGC</li> </ul>
Password	<ul style="list-style-type: none"> <li>• It's a required field.</li> <li>• String(40)</li> <li>• Password length must be between 5-40 characters long</li> <li>• Characters allowed are number and alphabet.</li> <li>• Eg, 12345, abcde, 123abc, aBcDe, etc.</li> </ul>
Country	<ul style="list-style-type: none"> <li>• A two-letter ISO-3166 country code</li> <li>• It's a optional field.</li> <li>• String (2)</li> <li>• Eg, CN (Refer to Appendix G for list of country codes)</li> </ul>
Sex	<ul style="list-style-type: none"> <li>• It's a optional field.</li> <li>• String (1)</li> <li>• Options: M or F</li> </ul>
BirthDate	<ul style="list-style-type: none"> <li>• Player dirth date</li> <li>• It's a optional field.</li> <li>• Datetime yyyyMMdd format</li> </ul>

**Response Code:**

Respond Code	Respond Message	Remark
503	Player already exists.	Applicable to all products supported by this API.
506	Invalid player ID.	Applicable to all products supported by this API.
507	Invalid Currency.	Applicable to all products supported by this API.
524	Invalid Password	Applicable to all products supported by this API.
556	Player is not eligible due to an age restriction of 18.	Applicable to Provider: NetEnt ONLY.

### Sample Response:

#### i) For Response Code = 0:

```
{
  "Code": "0",
  "Message": "Successful.",
  "Currency": "CNY"
}
```

#### ii) For Response Code = 503:

```
{
  "Code": "503",
  "Message": "Player already exists.",
  "Currency": "-"
}
```

#### iii) For other Response Code:

```
{
  "Code": "506",
  "Message": "Invalid Player ID."
}
```

### Note:

- IMOne now allows same PlayerId to be registered for different Operators/Merchants. . If the PlayerID already registered in IMOne by other existing Operator/Merchant, you can still to register it.
- Operator must add a prefix in front of your PlayerID.
- One PlayerId can only be registered with one single currency.
- When this request comes in, if:
  - PlayerId exists in the system but with **different** Currency, Response Code 503 will be returned (to indicate the PlayerId has been registered with other Currency and can no longer be used).
  - By any chance if the PlayerId already exist in relevant Game Provider's database, Response Code 503 will still be returned (Generally, if Operator has added a prefix in front of the PlayerId, such situation does not commonly happen).
  - PlayerId exists in the system but with **same** Currency AND MerchantCode, Response Code 0 will be returned (to indicate the PlayerId has been registered successfully).
- Country, Sex and BirthDate is applicable to Provider: NetEnt ONLY and they are optional. Error code 612 "Invalid Argument" will returned if any of the following is occurring:-
  - Provided Country value does not comply with the two-letter ISO-3166 country code.
  - Provided Sex value does not comply with the one-letter sex code.
  - Provided BirthDate value does not comply with the format yyyyMMdd.

## 2.2 Check Player Exists

This API returns the validity of a player id.

**URL:** POST Player/CheckExists

### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "PlayerId": "myPlayerId"
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>Merchant unique ID</li> <li>It's a required field.</li> <li>String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>Player's login ID</li> <li>It's a required field.</li> <li>String (25)</li> <li>Player ID length must be between 5-25 characters long.</li> <li>Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>

### Response Code:

Respond Code	Respond Message	Remark
503	Player already exists.	Applicable to all products supported by this API.
504	Player does not exist.	Applicable to all products supported by this API.
506	Invalid player ID.	Applicable to all products supported by this API.

### Sample Response:

#### i) For Response Code = 0:

```
{
  "Code": "0",
  "Message": "Successful.",
  "Currency": "CNY"
}
```

#### ii) For Response Code = 503:

```
{
  "Code": "503",
  "Message": "Player already exists.",
  "Currency": "-"
}
```

### iii) For other Response Code:

```
{
  "Code": "506",
  "Message": "Invalid Player ID."
}
```

#### Note:

- When this request comes in, if:
  - PlayerId exists in the system with **same** MerchantCode, Response Code 0 will be returned (to indicate the PlayerId was registered successfully). Player's registered Currency will also be returned for the verification at Operator side.
  - By any chance if the PlayerId already exist in relevant Game Provider's database, Response Code 503 will still be returned (Generally, if Operator has added a prefix in front of the PlayerId, such situation does not commonly happen).
  - PlayerId does not exist in the system, Response Code 504 will be returned (to indicate the PlayerId can be used).

## 2.3 Set Password

This API can be used for setting new password of player.

**URL:** POST Player/ResetPassword

#### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "PlayerId": "myPlayerId",
  "Password": "mypassword"
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>• Player's login ID</li> <li>• It's a required field.</li> <li>• String (25)</li> </ul>

	<ul style="list-style-type: none"> <li>• Player ID length must be between 5-25 characters long.</li> <li>• Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
Password	<ul style="list-style-type: none"> <li>• It's a required field.</li> <li>• String(40)</li> <li>• Password length must be between 5-40 characters long.</li> <li>• Characters allowed are number and alphabet.</li> <li>• Eg, 12345, abcde, 123abc, aBcDe, etc.</li> </ul>

**Response Code:**

Respond Code	Respond Message	Remark
504	Player does not exist.	Applicable to all products supported by this API.
506	Invalid player ID.	Applicable to all products supported by this API.
524	Invalid Password	Applicable to all products supported by this API.

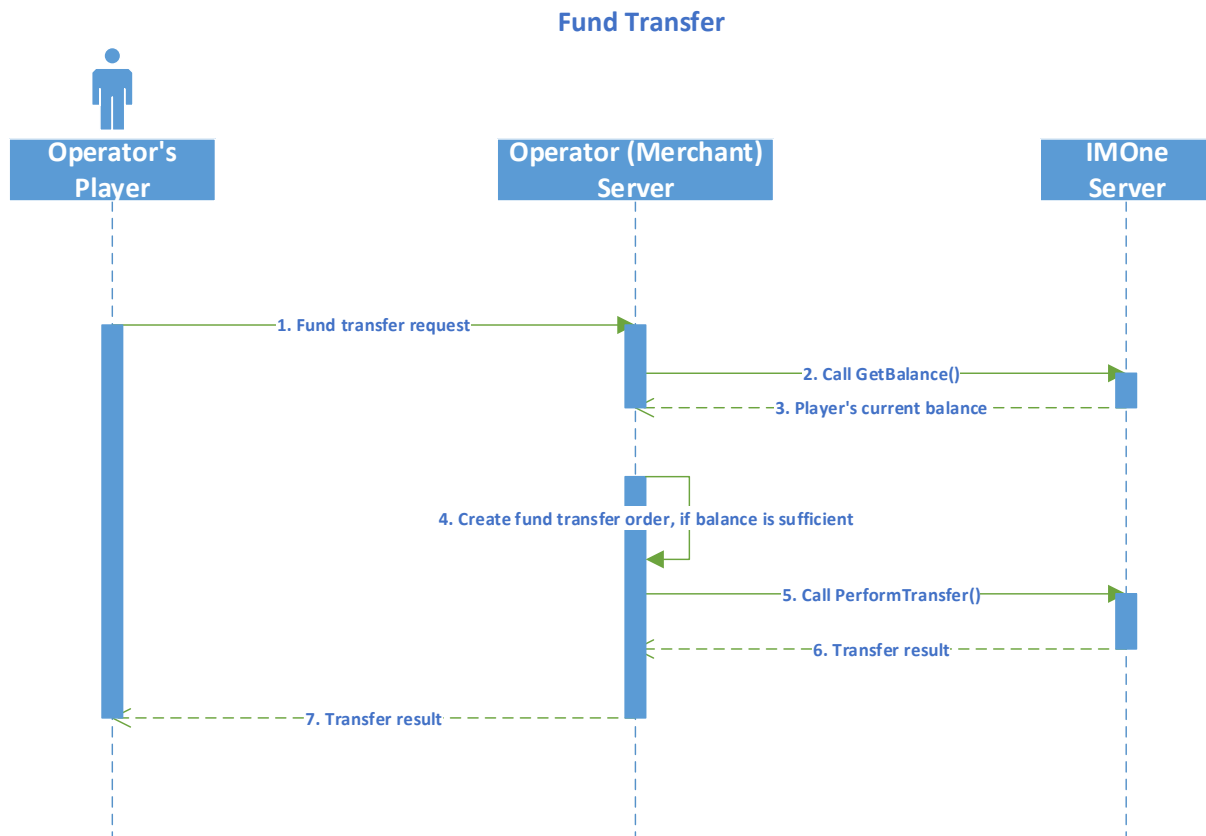

**Sample Response:**

```
{
  "Code": "0",
  "Message": "Successful."
}
```

## 2.4 Fund Transfer

This API performs fund in (deposit) or fund out (withdrawal). Fund out transaction is indicated with negative sign (e.g. -100).

### Note:

There is no need to call GetBalance() API before performing fund in. However, please call GetBalance() API (Refer 2.5 Get Player's Current Balance) before performing fund out, to make sure the player has sufficient balance before proceeding.

**URL:** POST Transaction/PerformTransfer

### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "PlayerId": "myPlayerId",
  "ProductWallet": 101,
  "TransactionId": "TransactionId001",
  "Amount": 20
}
```

}

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>• Player's login ID</li> <li>• It's a required field.</li> <li>• String (25)</li> <li>• Player ID length must be between 5-25 characters long.</li> <li>• Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>• It's a required field.</li> <li>• Int</li> <li>• Refer Appendix A: Product Wallet Code</li> </ul>
TransactionId	<ul style="list-style-type: none"> <li>• The unique id for a transaction from merchant.</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
Amount	<ul style="list-style-type: none"> <li>• It's a required field.</li> <li>• Float</li> <li>• Only accept number. For example: 1234567890</li> <li>• The decimal is up to 2 decimal places.</li> <li>• For all product (including MWG), Response code 519 will be returned if amount format is invalid (Eg, Amount = abc or 12.00001 etc).</li> <li>• For MWG (ProductWallet = 2), It only accepts integer amount. Response code 519 will also be returned if decimal value is received. The amount must be multiply of currency rate. Response code 543 will be returned if amount is NOT multiple of currency rate (Eg, Conversion rate is 200 KRW : 1 MWG coin. Response code 543 will be returned for Amount = 199 or 299 etc).</li> </ul> <p>For VG Gaming (ProductWallet = 604) For Fund In, it only accepts integer amount. Response code 519 will also be returned if decimal value is received. For Fund Out, it accepts up to 2 decimals.</p>

#### Response Code:

Respond Code	Respond Message	Remark
--------------	-----------------	--------

0	Successful.	Applicable to all products supported by this API. Status = Approved
504	Player does not exist.	Applicable to all products supported by this API.
506	Invalid player ID.	Applicable to all products supported by this API.
507	Invalid Currency.	Applicable to all products supported by this API.
508	Invalid Product Wallet.	Applicable to all products supported by this API.
509	Invalid transaction Id.	Applicable to all products supported by this API.
510	Insufficient amount.	Applicable to all products supported by this API. Status = Declined
514	Transaction Id is duplicated in IMOne system.	Applicable to all products supported by this API.
516	Transaction id is not found at provider side.	Applicable to all products supported by this API. Status = Declined
517	Transaction is being processed by provider.	Applicable to all products supported by this API. Status = Processed Transaction is being processed by provider, please use CheckTransferStatus() API to get the latest status. (Refer 2.4.1 Check Transfer Status)
519	Invalid amount format.	Applicable to all products supported by this API.
520	Transaction is being processed by IMOne system.	Applicable to all products supported by this API. Status = Processed Transaction is being processed by IMOne system, please use CheckTransferStatus() API to

		get the latest status. (Refer 2.4.1 Check Transfer Status)
523	Transaction Id is duplicated at provider side.	Applicable to all products supported by this API.
540	Player was not created successfully or inactive at provider side.	Applicable to Transfer Wallet product only (i.e PlayTech). Status = Declined
541	Transaction has been processed, the status is declined.	Applicable to all products supported by this API. Status = Declined
542	Player is inactive.	Applicable to all products supported by this API.
543	Invalid amount. Amount must be multiple of the currency rate.	Applicable to MWG only.
544	Transaction cannot be processed while player is still in game.	Applicable to MWG & VG Gaming only. (Only Transfer In is allowed while player is in the game. Transfer out will return this error.)
548	Player is suspended.	Applicable to all products supported by this API.
557	The API is called within minimum interval allowed.	Applicable to IG Lottery only.
566	System has failed to send a response. Please contact support. Ref info: Provider <provider code> Trace ID <trace number>.	Applicable to IM Casino only. This response code returned if any of the API to provider is returned failed.
567	Previous request is yet to be completed. Please try again. Trace Id <trace number>	Applicable to IM Casino only. This response code returned if player send a new request while the previous request is yet completed. The trace number will be different in every case.
560	Other transaction is yet to be processed, this transaction is declined.	Applicable for SGWin Gaming only. Status = Declined

603	Deposit limit for the ongoing period has been exceeded.	Applicable to PlayTech only. Status = Declined
604	Amount exceeds maximum deposit limit.	Applicable to PlayTech and MWG only. Status = Declined
605	Amount exceeds minimum deposit limit.	Applicable to PlayTech only. Status = Declined

**Note:**

Those responses (eg, 509, 557) with no “Status” are usually due to the transaction was not found/never created or the transaction status was undetermined at the point of API request was sent. Please check all the input parameters are correct and retry again.

**Sample Response:**

```
{
  "Code": "0",
  "Message": "Successful.",
  "Status": "Approved"
}
```

## 2.4.1 Check Transfer Status

This API returns the status of a player’s transfer.

**Note:**

**IMPORTANT:** If FundTransfer API’s returned response status = Processed, CheckTransferStatus() API must be called in order to retrieve the latest status of each transaction in later time.

**URL:** POST Transaction/CheckTransferStatus

**Input**

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "PlayerId": "myPlayerId",
  "TransactionId": "TransactionId001",
  "ProductWallet": 101
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>Merchant unique ID</li> <li>It’s a required field.</li> </ul>

	<ul style="list-style-type: none"> <li>String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>Player's login ID</li> <li>It's a required field.</li> <li>String (25)</li> <li>Player ID length must be between 5-25 characters long.</li> <li>Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
TransactionId	<ul style="list-style-type: none"> <li>Player's transaction ID from merchant.</li> <li>It's a required field.</li> <li>String (50)</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>It's a required field.</li> <li>Int</li> <li>Refer Appendix A: Product Wallet Code.</li> </ul>

**Response Code:**

567	Previous request is yet to be completed. Please try again. Trace Id <trace number>	Applicable to IM Casino only. This response code returned if player send a new request while the previous request is yet completed. The trace number will be different in every case.

**Note:**

Those responses (eg, 509, 557) with no “Status” are usually due to the transaction was not found/never created or the transaction status was undetermined at the point of API request was sent. Please check all the input parameters are correct and retry again.

**Sample Response:**

```
{
  "Code": "0",
  "Message": "Successful.",
  "Status": "Approved"
}
```

## 2.5 Get Player's Current Balance

This API returns the current balance of a player.

**URL:** POST Player/GetBalance

### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "PlayerId": "myPlayerId",
  "ProductWallet": 101
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>• Player's login ID</li> <li>• It's a required field.</li> <li>• String (25)</li> <li>• Player ID length must be between 5-25 characters long.</li> <li>• Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>• It's a required field.</li> <li>• Int</li> <li>• Refer Appendix A: Product Wallet Code</li> </ul>

### Response Code:

Respond Code	Respond Message	Remark
504	Player does not exist.	Applicable to all products supported by this API.
506	Invalid player ID.	Applicable to all products supported by this API.
508	Invalid Product Wallet.	Applicable to all products supported by this API.
557	The API is called within minimum interval allowed.	Applicable to IG Lottery ONLY.
566	System has failed to send a response. Please contact support. Ref info: Provider <provider code> Trace ID <trace number>.	Applicable to IM Casino only. This response code returned if any of the API to provider is returned failed.

		The trace number will be different in every case.
567	Previous request is yet to be completed. Please try again. Trace Id <trace number>	Applicable to IM Casino only. This response code returned if player send a new request while the previous request is yet completed. The trace number will be different in every case.

**Sample Response:**

```
{
  "Code": "0",
  "Message": "Successful.",
  "Balance": 189910,
  "Currency": "CNY"
}
```

**Note:**

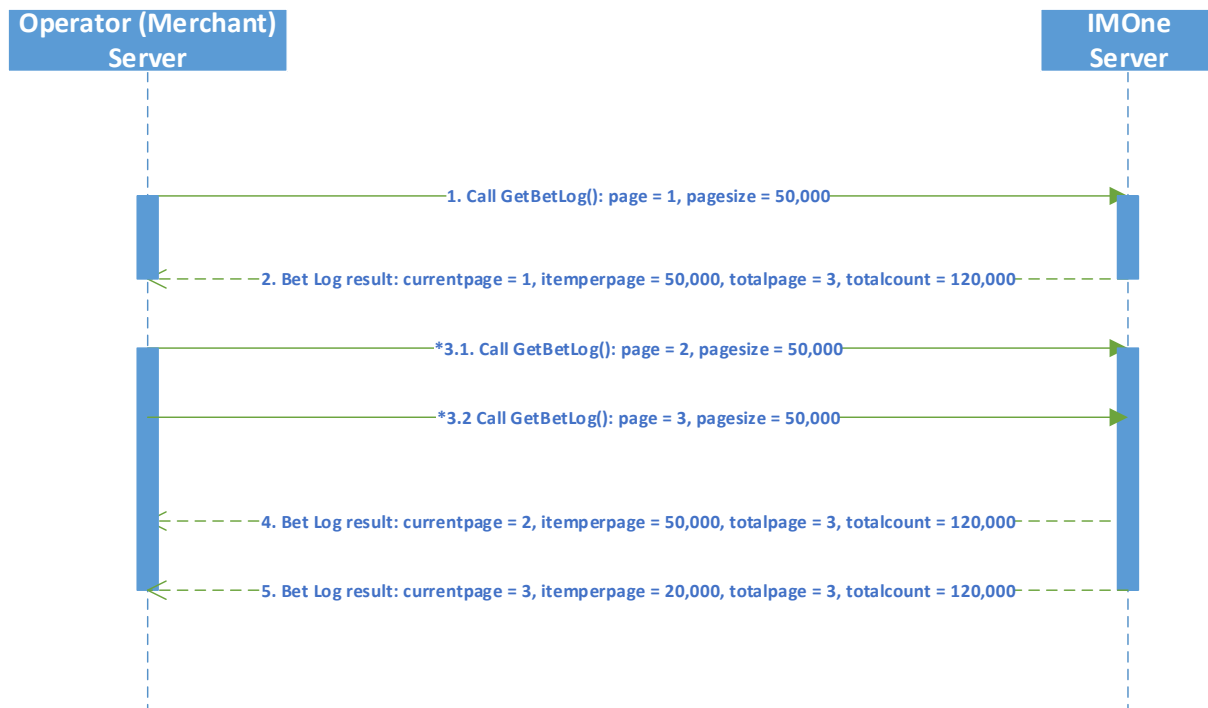

Response may return Balance up to 3 decimal points.

Please note that Balance may go negative if there is cancel settlement case happen for that player.

## 2.6 Get Bet Log

This API returns the player Bet history (For IMSportsbook, IMESports BetLog, please refer Section 2.6.1).

**Get Bet Log (Eg, retrieve bet log with total record of 120,000 items)**

\*3.1 and 3.2 can be fired concurrently. Once the concurrent limit is reached, it is needed to wait at least one response to return before the next request can be fired.

**URL:** POST Report/GetBetLog

### Note:

- Bet log time range is limit up to 10 minutes (Eg, 2016-10-10 00.00.00 - 2016-10-10 00.10.00) per request.
- Exceptional for Product wallet = 102 (PlayTech), time range limit is up to 30 minutes (Eg, 2016-10-10 00.00.00 - 2016-10-10 00.30.00) per request.
- Maximum page size is 50,000. Merchant will need to request for next page if return records is more than 50,000.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.
- The available bet log data may delay up to 15 minutes. It is recommended to set the date range to 15 minutes before the current date time (Eg, current date time is 2016-10-10 00:30:00, the date range can be set is 2016-10-10 00:05:00 - 2016-10-10 00:15:00). Refer Appendix E for

further detail.

- Please note that bet log is searched by LastUpdatedDate, the date time where IMOne system last updated the bet record (Means StartDate and EndDate parameter is searching LastUpdatedDate).
- Depends on provider's response, one bet record may be updated more than once (Eg, settlement(freespin) comes slightly later after bet placement). In such case, operator is advised to update the corresponding bet record accordingly, when updated bet record is received.
- Recommended for faster response (product wallet = 102):
  - Request with smaller time range.
  - Request with maximum page size (50,000) and lesser pages instead of smaller page size and more pages.
  - When request concurrent calls, request from different periods of time range.

### Input

```
{
  "MerchantCode":"6657f2a9-94f3-47bb-870f-03a880481d66",
  "StartDate":"2016-10-10 00.00.00",
  "EndDate":"2016-10-10 00.05.00",
  "Page":1,
  "PageSize":50000,
  "ProductWallet":101,
  "Currency":"CNY"
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
StartDate	<ul style="list-style-type: none"> <li>• Start datetime of bet log's LastUpdatedDate</li> <li>• It's a required field.</li> <li>• Datetime yyyy-MM-dd HH.mm.ss format</li> </ul>
EndDate	<ul style="list-style-type: none"> <li>• End datetime of bet log's LastUpdatedDate</li> <li>• It's a required field.</li> <li>• Datetime yyyy-MM-dd HH.mm.ss format</li> </ul>
Page	<ul style="list-style-type: none"> <li>• Page of bet log</li> <li>• It's a required field.</li> <li>• Int</li> <li>• Number of page (pagination) will be returned at the end of successful response, please proceed to request further page if total page is greater than 1.</li> </ul>
PageSize	<ul style="list-style-type: none"> <li>• Number of records per page</li> <li>• It's a required field (if Product Wallet is NOT 301 or 401).</li> <li>• Int</li> </ul>

	<ul style="list-style-type: none"> <li>Maximum request is 50,000 records.</li> </ul>

```

#### Note:

1. Response may return BetAmount, ValidBet, WinLoss, PlayerWinLoss, LossProze, Tips, CommissionRate, Commission up to 4 decimal points.
2. BetOn and BetType is only provided in ZH-CN.
3. One BetId may have multiple records with different GameNold, if the Bet has been adjusted and “replaced” by a new settlement with a new GameNold. When this happens, the Bet with earlier GameNold will have the Status be updated from “**Settled**” to “**Adjusted**”. The bet record’s LastUpdatedDate will be changed. Please overwrite the old bet record with this one. Another new bet record (same betID with new GameNold) will be available to grab in later time.
4. When a bet is cancelled, the Status will be updated from “**Settled**” to “**Cancelled**”. The bet record’s LastUpdatedDate will be changed. Please overwrite the old bet record with this one.
5. Bet log record with “Adjusted” and “Cancelled” status can be seen as no longer valid. For one betId, please always refer the bet record with the greatest/newest GameNold as valid record.

6. Please refer Appendix E for the available bet log data delay up.

#### Field Description – Result

Fields	Data Type	Description
Provider	String (50)	Refer Appendix B for Provider Code.
GameId	String (50)	IMOne internal game id for the game.
GameName	String (100)	Name of the game.
GameNo	String (50)	Game Round ID provided by provider.
GameNold	String (50)	Settlement ID provided by provider.
PlayerId	String (50)	IMOne internal player id of the player.
ProviderPlayerId	String (50)	Provider's Player ID.
Currency	String (3)	Currency used for the transaction.
Tray	String (50)	Tray of the player.
BetId	String (100)	Bet ID of the transaction.
BetOn	String (4000)	Bet Category of the transaction.
BetType	String (4000)	Bet Type of the transaction.
BetDetails	String (4000)	Further bet detail of the bet (if any, subject to the Bet Type of the bet).
Odds, Odds2, OddsC, OddsC2	String (4000)	For IG Lottery Odds of the bet (Value may be 0 if they are not applicable to the bet) For VR Lottery Only Odds will be provided. Odds2, OddsC, OddsC2 are not applicable to this provider. For SG WIN Lottery Odds info is listed at Bet Detail. Important: The data type of all these fields is string.
BetAmount	Decimal (20,4)	Bet amount of the transaction.
ValidBet	Decimal (20,4)	Valid bet amount of the transaction.
WinLoss	Decimal (20,4)	Player win/loss amount of the transaction. (According to Operator Odds settings).
PlayerWinLoss	Decimal (20,4)	Player win/loss amount of the transaction. (According to Player Odds settings). Applicable to VR Lottery ONLY.
LossPrize	Decimal (20,4)	Loss amount due to adjustment. Applicable to VR Lottery ONLY.
Tips	Decimal (20,4)	Tips amount given by Player. Applicable to VR Lottery ONLY.
CommissionRate	Decimal (20,4)	Commission Rate. Applicable to SG WIN Lottery ONLY.
Commission	Decimal (20,4)	Commission given by Provider. Applicable to SHICAI Lottery ONLY.
Status	String (50)	Status of the transaction. Available Status: Open,

		Settled, Cancelled, Adjusted.
BetDate	String (50)	Bet placement timestamp provided by provider.
ResultDate	String (100)	Result/Settlement timestamp provided by provider.
DateCreated	String (100)	IMOne timestamp of the transaction received.
LastUpdatedDate	String (100)	IMOne's last updated date to the bet log.

**2.6.1 Get Bet Log (IM Sportsbook, IM ESports)**

This API returns the player Bet history for IM Sportsbook (Product Wallet = 301 or 401).

**URL:** POST Report/GetBetLog

**Note:**

- Different from other products, bet log time range per request is limit up to 31 days (Eg, 2016-10-01 00.00.00 - 2016-10-31 23.59.59)
- However, we strongly recommend our Operators to retrieve bet log as per guide in **Appendix E and Appendix F**.
- Different from other products also, no PageSize parameter is required. Merchant will need to request for next page if Response's TotalPage is more than 1.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.
- The available bet log data may delay up to 5 minutes. Refer Appendix E for further detail.
- The IM Sportsbook Bet Log can be searched by Bet Date or Event Date (determined by DateFilterType parameter).
- Currency parameter is not applicable to IM Sportbook and IM ESports. If this currency parameter is passed, system will ignore this parameter.

**Input**

```

**Field Description – Result**

Parent Level Field	Child Level Field	Description
Provider		Refer Appendix B for Provider Code.
GameID		IMOne internal game id for the game.
BetId		Bet/Wager Number
WagerCreationDateTime		Wager created date time Format: YYYY-MM-DD HH:mm:ss +08:00
PlayerId		Member code (based on the selection of input parameter)
ProviderPlayerId		Provider's Player ID.
Currency		Member currency code
StakeAmount		Member inputted stake amount
MemberExposure		Member exposure (actual lose money)
PayoutAmount		Potential Payout amount
WinLoss		Member win loss amount. Available only for settled wager, return 0 for non-settled wager.
OddsType		Odds type of a bet (HK/ EURO/ MALAY/ INDO)
WagerType		Single/ Combo
Platform		Web/ Mobile
IsSettled		Status of settlement. 0 = Not Settled, 1 = Settled
IsConfirmed		Status of confirmation 0=Pending, 1=Confirmed, 2=Cancelled
IsCancelled		Status of cancellation 0=Not cancel, 1=Cancel
BetTradeStatus		Status of BetTrade (Cancel/ Sold). Return Null if is not bet trade ticket.

BetTradeCommission		This field is no longer in use. Always return 0.
BetTradeBuybackAmount		Cash Out Buy Back amount. Return 0 if is not Cash Out Wager.
LastUpdatedDate		Wager last modified date time Format: YYYY-MM-DD HH:mm:ss +08:00
ComboType		Doubles, Trebles, Trixie, Yankee, Super Yankee, Heinz, Super Heinz, Goliath, Block9, Block10, FourFolds, FiveFolds, SixFolds, SevenFolds, EightFolds, NineFolds, TenFolds Return None if wagerType = Single
DetailItems		
	Market	Early, Today, Live Return Null if betType = OR (outright event)

**Field Description – Result**

Parent Level Field	Child Level Field	Description
Provider		Refer Appendix B for Provider Code.
GameID		IMOne internal game id for the game.
BetId		Bet/Wager Number
WagerCreationDateTime		Wager created date time Format: YYYY-MM-DD HH:mm:ss +08:00
LastUpdatedDate		Wager last Updated date time Format: YYYY-MM-DD HH:mm:ss +08:00
PlayerId		IMOne internal player id of the player.
ProviderPlayerId		Provider's Player ID.
Currency		Currency used for the bet.
StakeAmount		Stake Amount of the bet.
WinLoss		Member win loss amount. Available only for settled wager, return 0 for non-settled wager.
OddsType		Odds Type of a bet. (Eg, HK, Malay or Euro)
WagerType		Single/ Parlayall
Platform		WEB/MOBILE

IsSettled		Status of settlement. 0 = Not Settled, 1 = Settled
IsCancelled		Status of cancellation 0=Not cancel, 1=Cancel
SettlementDateTime		Wager Settlement date time Format: YYYY-MM-DD HH:mm:ss +08:00
DetailItems		
	EventName	
	EventDateTime	Format: YYYY-MM-DD HH:mm:ss +08:00
	CompetitionName	
	HomeTeamName	
	AwayTeamName	
	FavTeam	"H" – home team is favourite. "A" – away team is favorite.
	BetType	Bet Type of the bet.
	Selection	Refer to <b>IMOne API Specification - Appendix - Bet Type List v1.x.xlsx</b> .
	Odds	Odds of a bet.
	HomeTeamHTScore	Home team 1st half score. This field will only have value <u>after event is settled.</u>
	AwayTeamHTScore	Away team 1st half score. This field will only have value <u>after event is settled.</u>
	HomeTeamFTScore	Home team full time score. This field will only have value <u>after event is settled.</u>
	AwayTeamFTScore	Away team full time score. This field will only have value <u>after event is settled.</u>
	WagerHomeTeamScore	Home team score as per the time when bet is confirmed.
	WagerAwayTeamScore	Away team score as per the time when bet is confirmed.
	Handicap	Handicap of a bet.
	Sportsname	LOL, DOTA2, CSGO and etc.
	EventID	Internal event ID
	EventType	Type of the event.
	GameOrder	Order of the game.
	IsWagerItemCancelled	0=Not cancel, 1=Cancel
	ParlaySign	Applicable to Parley Bet only.

	ParlayWagerCreationDateTime	Applicable to Parley Bet only. Wager created date time of each Parley Bet. Format: YYYY-MM-DD HH:mm:ss +08:00

#### Field Description – Pagination

Fields	Description
CurrentPage	Current page of the reported data.
TotalPage	Total page of the reported data.
ItemPerPage	Number of bet log per page.
TotalCount	Total number of the reported bet log.

## 2.6.2 Get Reseller Bet Log

This API returns the player Bet history for the entire Operator under the specific Reseller. This API only applicable for Reseller

(For IMSportsbook and IMESport ResellerBetLog, please refer Section 2.6.3).

**URL:** POST Report/GetResellerBetLog

#### Note:

- Bet log time range is limit up to 10 minutes (Eg, 2016-10-10 00:00:00 - 2016-10-10 00:10:00) per request.
- Maximum page size is 50,000. Merchant will need to request for next page if return records is more than 50,000.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.
- The available bet log data may delay up to 15 minutes. It is recommended to set the date range to 15 minutes before the current date time (Eg, current date time is 2016-10-10 00:30:00, the date range can be set is 2016-10-10 00:05:00 - 2016-10-10 00:15:00). Refer Appendix E for further detail.
- Please note that bet log is searched by LastUpdatedDate, the date time where IMOne system last updated the bet record (Means StartDate and EndDate parameter is searching LastUpdatedDate).
- Depends on provider's response, one bet record may be updated more than once (Eg, settlement(freespin) comes slightly later after bet placement). In such case, operator is advised to update the corresponding bet record accordingly, when updated bet record is received.
- Recommended for faster response (product wallet = 102):
  - Request with smaller time range.

- Request with maximum page size (50,000) and lesser pages instead of smaller page size and more pages.
- When request concurrent calls, request from different periods of time range.

### Input

```
{
  "ResellerCode":"5554-88555ssdf8565-666665dwdrtyh8wsad",
  "StartDate":"2016-10-10 00.00.00",

### Response Code:

Respond Code	Respond Message	Remark
507	Invalid Currency.	Applicable to all products supported by this API.
508	Invalid Product Wallet.	Applicable to all products supported by this API.
525	Invalid timerange, it must be within the configured timerange.	Applicable to all products supported by this API.
526	StartDate can't be later than EndDate or now.	Applicable to all products supported by this API.
527	Bet details in process. Please try again.	Applicable to all products supported by this API.
528	Invalid datetime format.	Applicable to all products supported by this API.
529	Invalid Page Size.	Applicable to all products supported by this API.
558	No data found.	Applicable to all products supported by this API except PlayTech.

### Sample Response:

#### ProductWallet = 102 (PlayTech)

```
{
  "Code": "0",
  "Message": "Successful.",
  "Result": [
    {
      "PlayerName": "raheem42",
      "ProviderPlayerId": "raheem42",
      "OperatorName": "IMOneOperator",
      "WindowCode": 0,
      "GameId": "1",
      "GameCode": "18556515376",
      "GameType": "Fixed Odds",
      "GameName": "Monkey Thunderbolt (mnkt)",
      "SessionId": "89292371",
      "Bet": 0,
      "Win": 0,
      "ProgressiveBet": 0,
      "ProgressiveWin": 0,
      "Balance": 5,

```

```

    "CurrentBet": 0,
    "GameDate": "2015-01-01 09:58:12",
    "LiveNetwork": "",
    "ExitGame": "0",

```

**Note:**

1. Response may return BetAmount, ValidBet, WinLoss, PlayerWinLoss, LossPrize, Tips, CommissionRate, Commission up to 4 decimal points.
2. BetOn and BetType is only provided in ZH-CN.
3. One BetId may have multiple records with different GameNold, if the Bet has been adjusted and “replaced” by a new settlement with a new GameNold. When this happens, the Bet with earlier GameNold will have the Status be updated from “Settled” to “Adjusted”. The bet record’s LastUpdatedDate will be changed. Please overwrite the old bet record with this one. Another new bet record (same betID with new GameNold) will be available to grab in later time.
4. When a bet is cancelled, the Status will be updated from “Settled” to “Cancelled”. The bet record’s LastUpdatedDate will be changed. Please overwrite the old bet record with this one.
5. Bet log record with “Adjusted” and “Cancelled” status can be seen as no longer valid. For one betId, please always refer the bet record with the greatest/newest GameNold as valid record.

6. Please refer Appendix E for the available bet log data delay up.

#### Field Description – Result

Fields	DataType	Description
Provider	String (50)	Refer Appendix B for Provider Code.
Gameld	String (50)	IMOne internal game id for the game.
GameName	String (100)	Name of the game.
GameNo	String (50)	Game Round ID provided by provider.
GameNold	String (50)	Settlement ID provided by provider.
PlayerId	String (50)	IMOne internal player id of the player.
ProviderPlayerId	String (50)	Provider's Player ID.
OperatorName	String (50)	IMOne Operator Name
Currency	String (3)	Currency used for the transaction.
Tray	String (50)	Tray of the player.
BetId	String (100)	Bet ID of the transaction.
BetOn	String (4000)	Bet Category of the transaction.
BetType	String (4000)	Bet Type of the transaction.
BetDetails	String (4000)	Further bet detail of the bet (if any, subject to the Bet Type of the bet).
Odds, Odds2, OddsC, OddsC2	String (4000)	<p>For IG Lottery Odds of the bet (Value may be 0 if they are not applicable to the bet)</p> <p>For VR Lottery Only Odds will be provided. Odds2, OddsC, OddsC2 are not applicable to this provider)</p> <p>For SG WIN Lottery Odds info is listed at Bet Detail.</p> <p>Important: The data type of all these fields is string.</p>
BetAmount	Decimal (20,4)	Bet amount of the transaction.
ValidBet	Decimal (20,4)	Valid bet amount of the transaction.
WinLoss	Decimal (20,4)	Player win/loss amount of the transaction.
PlayerWinLoss	Decimal (20,4)	Player win/loss amount of the transaction. (According to Player Odds settings). Applicable to VR Lottery ONLY.
LossPrize	Decimal (20,4)	Loss amount due to adjustment. Applicable to VR Lottery ONLY.
Tips	Decimal (20,4)	Tips amount given by Player. Applicable to VR Lottery ONLY.
CommissionRate	Decimal (20,4)	Commission Rate. Applicable to SG WIN Lottery ONLY.
Commission	Decimal (20,4)	Commission given by Provider. Applicable to SHICAI Lottery ONLY.

Status	String (50)	Status of the transaction. Available Status: Open, Settled, Cancelled, Adjusted.
BetDate	String (50)	Bet placement timestamp provided by provider.
ResultDate	String (100)	Result/Settlement timestamp provided by provider.
DateCreated	String (100)	IMOne timestamp of the transaction received.
LastUpdatedDate	String (100)	IMOne's last updated date to the bet log.

### 2.6.3 Get Reseller Bet Log (IM Sportsbook, IM ESports)

This API returns the player Bet history of IM Sportsbook, IM ESports (Product Wallet = 301 or 401) for the entire Operator under the specific Reseller. This API only applicable for Reseller

**URL:** POST Report/GetResellerBetLog

#### Note:

- Different from other products, bet log time range per request is limit up to 31 days (Eg, 2016-10-01 00.00.00 - 2016-10-31 23.59.59)
- However, we strongly recommend to retrieve bet log as per guide in **Appendix E and Appendix F**.
- Different from other products also, no PageSize parameter is required. Merchant will need to request for next page if Response's TotalPage is more than 1.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.
- The available bet log data may delay up to 5 minutes. Refer Appendix E for further detail.
- The IM Sportsbook Bet Log can be searched by Bet Date or Event Date (determined by DateFilterType parameter).
- Currency parameter is not applicable to IM Sportbook and IM ESports. If this currency parameter is passed, system will ignore this parameter.

#### Input

```
{

PlayerId		Member code (based on the selection of input parameter)
ProviderPlayerId		Provider's Player ID.
OperatorName		IMOne Operator Name
Currency		Member currency code
StakeAmount		Member inputted stake amount
MemberExposure		Member exposure (actual lose money)
PayoutAmount		Potential Payout amount
WinLoss		Member win loss amount. Available only for settled wager, return 0 for non-settled wager.
OddsType		Odds type of a bet (HK/ EURO/ MALAY/ INDO)
WagerType		Single/ Combo
Platform		Web/ Mobile
IsSettled		Status of settlement. 0 = Not Settled, 1 = Settled
IsConfirmed		Status of confirmation 0=Pending, 1=Confirmed, 2=Cancelled

IsCancelled		Status of cancellation 0=Not cancel, 1=Cancel
BetTradeStatus		Status of BetTrade (Cancel/ Sold). Return Null if is not bet trade ticket.
BetTradeCommission		This field is no longer in use. Always return 0.
BetTradeBuybackAmount		Cash Out Buy Back amount. Return 0 if is not Cash Out. Wager.
LastUpdatedDate		Wager last modified date time Format: YYYY-MM-DD HH:mm:ss +08:00
ComboType		Doubles, Trebles, Trixie, Yankee, Super Yankee, Heinz, Super Heinz, Goliath, Block 9, Block 10, FourFolds, FiveFolds, SixFolds, SevenFolds, EightFolds, NineFolds, TenFolds Return None if wagerType = Single
DetailItems		
	Market	Early, Today, Live Return Null if betType = OR (outright event)
	EventName	
	EventDateTime	Format: YYYY-MM-DD HH:mm:ss +08:00
	CompetitionName	
	HomeTeamName	
	AwayTeamName	
	FavTeam	"H" – home team is favourite. "A" – away team is favorite. Return NULL if bet type is "Outright" or "Parlay".
	BetType	CS, FGLG, TG etc
	BetTypeDesc	Correct Score, First Goal / Last Goal...etc
	Period	1H, 2H, FT Return Null if betType = OR (outright event)
	Selection	Refer to <b>IMOne API Specification - Appendix - Bet Type List v1.x.xlsx</b> .
	Odds	
	HomeTeamHTScore	Home team 1st half score. This field will only have value <u>after event is settled</u> .
	AwayTeamHTScore	Away team 1st half score. This field will only have value <u>after event is settled</u> .
	HomeTeamFTScore	Home team full time score. This field will only have value <u>after event is settled</u> .

	AwayTeamFTScore	Away team full time score. This field will only have value <u>after event is settled</u> .
	WagerHomeTeamScore	Home team score as per the time when bet is confirmed.
	WagerAwayTeamScore	Away team score as per the time when bet is confirmed.
	Handicap	Handicap of a bet. Return NULL if bet type = OR (outright event) "-" => Away team giving handicap "+" => Home team giving handicap
	IsWagerItemCancelled	0=Not cancel, 1=Cancel
	Sportsname	Soccer, Basketball and etc.
	EventID	Internal event ID
	Specifier	Specifier of a bet. Return NULL is it is not applicable.

#### Field Description – Pagination

Fields	Description
CurrentPage	Current page of the reported data.
TotalPage	Total page of the reported data.
ItemPerPage	Number of bet log per page.
TotalCount	Total number of the reported bet log.

#### Sample Response:

##### ProductWallet = 401 (IM ESports) – Single Bet

Fields	Description
CurrentPage	Current page of the reported data.
TotalPage	Total page of the reported data.
ItemPerPage	Number of bet log per page.
TotalCount	Total number of the reported bet log.

## 2.7 Get Adjustment Log

This API returns the player Adjustment Log, which the transaction rejected by IMOne system due to game round has been closed, except the cancellation transaction.

**URL:** POST Report/GetAdjustmentLog

#### Note:

- Adjustment log time range is limit up to 10 minutes (Eg, 2016-10-10 00.00.00 - 2016-10-10 00.10.00) per request.
- Maximum page size is 50,000. Merchant will need to request for next page if return records is more than 50,000.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.
- The available adjustment log data may delay up to 15 minutes. It is recommended to set the date range to 15 minutes before the current date time (Eg, current date time is 2016-10-10 00:30:00, the date range can be set is 2016-10-10 00:05:00 - 2016-10-10 00:15:00). Refer Appendix E for further detail.
- Refer to Appendix E for more detail about each product's adjustment log data availability
- Please note that adjustment log is searched by datecreated, the date time where IMOne system

received the transaction request

#### Input

```
{

PageSize	<ul style="list-style-type: none"> <li>• Number of records per page</li> <li>• It's a required field</li> <li>• Int</li> <li>• Maximum request is 50,000 records.</li> </ul>
----------	--

#### Response Code:

Respond Code	Respond Message	Remark
507	Invalid Currency.	Applicable to all products supported by this API.
508	Invalid Product Wallet.	Applicable to all products supported by this API.
529	Invalid Page Size.	Applicable to all products supported by this API.

#### Sample Response:

```
{
  "Code": 0,
  "Message": "Successful.",
  "Result": [
    {
      "PlayerID": "MyPlayerID1",
      "Balance": 158926,
      "Currency": "CNY"
    },
    {
      "PlayerID": "MyPlayerID2",
      "Balance": 99,
      "currency": "CNY"
    }
  ],
  "Pagination": {
    "CurrentPage": 1,
    "TotalPage": 1,
    "ItemPerPage": 50000,
    "TotalCount": 1000
  }
}
```

#### Note:

Response may return Balance up to 3 decimal points.

Please note that Balance may go negative if there is cancel settlement case happen for that player.

### 3. REST API (Product Specific)

This section outlines all API calls, parameters and responses applicable to specific product only.

#### 3.1 Terminate Player session (PlayTech, LY Gaming, KY Gaming, VR Lottery, SG WIN Lottery, SG Win Gaming, Jumbo Slot, IM Gaming, IM Gamezone, IM Casino, NetEnt, Bole Gaming)

This API terminates the current session of the player. When there is an active user session on the game server for some reasons (e.g. multiple login from different IP or session time out), you need to use this API to kill the session before launching the game.

This API is only applicable to:

- PlayTech
- LY Gaming
- KY Gaming
- VR Lottery
- SG WIN Lottery
- SG Win Gaming
- Jumbo Slot
- IM Gaming
- IM Casino
- NetEnt
- Bole Gaming

**Note:**

- Please call this function when player logouts from your website.
- "ProductWallet" is optional parameter. If no specify, this system will terminate session for all applicable products.

**URL:** POST Player/TerminateSession

**Input**

```
{  
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",  
  "PlayerId": "PlayerId",  
  "ProductWallet": 503  
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>• Player's login ID</li> <li>• It's a required field.</li> <li>• String (25)</li> <li>• Player ID length must be between 5-25 characters long.</li> <li>• Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>• It's an OPTIONAL field.</li> <li>• Int</li> <li>• Refer Appendix A: Product Wallet Code.</li> <li>• If unsupported ProductWallet code is entered, error 508 will be returned</li> </ul>

#### Response Code:

Respond Code	Respond Message
504	Player does not exist
506	Invalid player ID
508	Invalid Product Wallet.

#### Sample Response:

```
{
  "Code": "0",
  "Message": "Successful."
}
```

## 3.2 Freeze Player Session (PlayTech)

This API can be used to update player Frozen status. When player Frozen status is Yes then player will not be able to launch games (from both Download Client and Website) and perform fund transfer.

This API is only applicable to PlayTech.

**URL:** POST Player/FreezePlayer

#### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
```

```

    "PlayerId": "PlayerId",
    "FrozenStatus":1,
    "ProductWallet":102
  }

```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>• Player's login ID</li> <li>• It's a required field.</li> <li>• String (25)</li> <li>• Player ID length must be between 5-25 characters long.</li> <li>• Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
FrozenStatus	<ul style="list-style-type: none"> <li>• It's a required field.</li> <li>• Boolean</li> <li>• 1 = Freeze</li> <li>• 0 = Unfreeze</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>• It's a required field.</li> <li>• Int</li> <li>• Refer Appendix A: Product Wallet Code.</li> <li>• 102 = PlayTech Wallet (Other product wallet code will receive Response Code 508.)</li> </ul>

#### Response Code:

Respond Code	Respond Message
504	Player does not exist.
506	Invalid player ID.
508	Invalid Product Wallet.
610	Invalid status.

#### Sample Response:

```

{
  "Code": "0",
  "Message": "Successful."
}

```

### 3.3 Check Player Token (PlayTech)

This API authenticates the token provided by PT when cashier page is launched from download client. Token can be gotten from the cashier URL when launched by PT (example below), then use Check Player Token API to verify if player is logged in. Merchant can then direct player to cashier page without having player to log in again at cashier page

This API is only applicable to PlayTech.

**URL:** POST Player/CheckPlayerToken

#### Input

```
{
  "MerchantCode":"6657f2a9-94f3-47bb-870f-03a880481d66",

  "Token":"test123",
  "ProductWallet":102
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>Merchant unique ID</li> <li>It's a required field.</li> <li>String (50)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>Player's login ID</li> <li>It's a required field.</li> <li>String (25)</li> <li>Player ID length must be between 5-25 characters long.</li> <li>Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
Token	<ul style="list-style-type: none"> <li>Playtech token (from cashier URL)</li> <li>It's a required field.</li> <li>String (5-40)</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>It's a required field.</li> <li>Int</li> <li>Refer Appendix A: Product Wallet Code</li> <li>102 = PlayTech Wallet (Other product wallet code will receive Response Code 508.)</li> </ul>

#### Response Code:

Respond Code	Respond Message
504	Player does not exist.
506	Invalid player ID.

508	Invalid Product Wallet.
531	Invalid Token.
542	Player is inactive.

**Sample Response:**

```
{
  "Code": "0",
  "Message": "Successful."
}
```

**Note:**

Expected URL when PT DL client launches cashier page, where u=playerId and x=token

[http://\[cashier.com\]/?u=TEST01&x=kSQJXsbv9bcwYNJKqbqgEPCQMNDQMADI](http://[cashier.com]/?u=TEST01&x=kSQJXsbv9bcwYNJKqbqgEPCQMNDQMADI)

### 3.4 Get GameStats (PlayTech)

This API returns data from PT of a player gamestats.

This API is only applicable to PlayTech.

**Note:**

- System only accepts hourly timestamp (Eg, 2015-01-01 00.00.00 - 2015-01-01 01.00.00). Response Code 525 will be returned if time range is invalid.
- As this API will take quite a while to response, recommended to call this API every hour for 1 hour data.
- The available data may delay up to 30 minutes. It is recommended to set the date range to 30 minutes before the current date time (Eg, current date time is 2015-01-01 03:30:00, the date range can be set is 2015-01-01 02:00:00 - 2015-01-01 03:00:00).
- Refer Section 1.3 for Concurrent Call Limit of this API.
- Please call this API to check Progressive Share.

**URL:** POST Report/GetGameStats

**Input**

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "StartDate": "2015-01-01 00.00.00",
  "EndDate": "2015-01-01 01.00.00",
  "ProductWallet": 102,
  "Currency": "CNY"
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>

TotalPages	Total page of reported data
ItemsPerpage	number of bet log per page
TotalCount	total number of bet log reported

### 3.5 Get BetFlow (PlayTech)

This API returns data from PT of a player gameflow. This API returns almost the same result with Gamestats report. The difference is this API provides nearly to real time games flow (up to 30 seconds update delay) and the available data is limited up to 48 minutes in the past with the request date range up to 30 minutes.

This API is only applicable to PlayTech.

**Note:**

- Maximum page size is 50,000. Merchant will need to request for next page if returned records is more than 50,000.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- Manual data range can be set from 30 seconds delay up to 48 hours in the past.
- Example: current time is "2019-01-03 00:00:00", then the available data will be "2019-01-01 00:00:00" up to "2019-01-02 23:59:29"
- BetFlow time range is limit up to 30 minutes (Eg, 2019-01-01 00:00:00 - 2019-01-01 00:30:00) per request.
- Recommended for faster response:
  - Request with smaller time range
  - Request with maximum page size (50,000) and lesser pages instead of smaller page size and more pages
  - When request concurrent calls, request from different periods of time range

**URL:** POST Report/GetBetFlow

**Input**

```
{
  "MerchantCode":"6657f2a9-94f3-47bb-870f-03a880481d66",

First Level	Second Level	Description
Name		IM Casino domain URL, please ignore this
Currency		The requested Currency
WinCount		Total count of Jackpot win since start
Timestamp		The timestamp for this request
Wins		Total win amount since start
Step		This is an estimation of how much the jackpot amount will increase in one second. The amount is in the respected Currency
Sign		Currency sign
Position		Please ignore this, all the result will be 0
Amount		Total amount of all available jackpot in respected Currency
GameList		
	GameGroup	Jackpot group code - Please see the game list for more information

	Local	0: The jackpot is contributed by all of Playtech licensee 1: The jackpot is contributed only by InplayMatrix licensee
	Step	This is an estimation of how much the jackpot amount will increase in one second. The amount is in the respected Currency
	Sign	Currency sign
	Position	Please ignore this, all the result will be 0
	Name	Jackpot Name - Please see the game list for more information
	Currency	The requested Currency
	Amount	Jackpot amount in respected Currency

### 3.7 Get Player Games (PlayTech)

This API returns data from PT of a player games session.

This API is only applicable to PlayTech.

**Note:**

- The available data is near to realtime.
- PlayerGames time range is limit up to 10 minutes (Eg, 2017-10-10 00.00.00 - 2017-10-10 00.10.00) per request.
- Please call this API to check Player games detail including player balance after bet.
- This API will return player games information for each round
- Request this API to get the specific URL of player round detail for a particular player
- May refer to GetBetLog API to get the exact player game date time and use that time as a startdate to query this API
- Recommended to call this API within 1 second of date range to avoid too many data in return (enddate = startdate + 1 second)
- "ID" in GetPlayerGames API response is same with "GameCode" in GetBetLog API response and "GameCode" in GetBetFlow API response
- Data return in API reponse is limit up to 50 records. Recommended not query with big timerange
- "URL" in return response is only valid for 1 hour. Please re-call this API to get the latest "URL" link.

**URL:** POST Report/GetPlayerGames

**Input**

```
{
  "MerchantCode":"6657f2a9-94f3-47bb-870f-03a880481d66",

## Field Description

Field	Description
Total Count	Total round within the requested time range
ID	roundid
Wins	Amount won
Bets	Amount bet
Endbalance	Player balance after round end
Gametime	Time of game
Gamecode	Game code
RSC	Remote Session Code. Value is always "null"
Description	Game description
Progressivebet	Jackpot/Progressive shares
Progressivewin	Jackpot/Progressive wins
Ctype	Client type. Value is always "casino"
Cplatform	Client platform Value will be DL, FL, or mobile
Dplatform	Will only have value if Cplatform is "mobile" Value will be native or html5

	Native = mobile apk
RNUM	Row number
URL	URL for more detail of player games

### 3.8 Set KYC Details (NetEnt)

This API is used to set KYC details as required by NetEnt.

This API is only applicable to NetEnt.

**URL:** POST Player/UpdatePlayerKYCDetail

#### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "PlayerList": [
    {
      "PlayerId": "SamplePlayerID1",
      "Country": "CN",
      "Sex": "M",
      "BirthDate": "19601227"
    },
    {
      "PlayerId": "SamplePlayerID2",
      "Country": "CN",
      "Sex": "M",
      "BirthDate": "19601227"
    }
  ]
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
PlayerList	<ul style="list-style-type: none"> <li>• Collection of Player(s)</li> <li>• See details below.</li> </ul>
Country	<ul style="list-style-type: none"> <li>• A two-letter ISO-3166 country code</li> <li>• It's a required field.</li> <li>• String (2)</li> </ul>

	<ul style="list-style-type: none"> <li>Eg, CN (Refer to Appendix G for list of country codes)</li> </ul>
Sex	<ul style="list-style-type: none"> <li>It's a required field.</li> <li>String (1)</li> <li>Options: M or F</li> </ul>
BirthDate	<ul style="list-style-type: none"> <li>Player dirth date</li> <li>It's a required field.</li> <li>Datetime yyyyMMdd format</li> </ul>

**Response Code:**

Respond Code	Respond Message
504	Player does not exist.
555	KYC Details already exists.
556	Player is not eligible due to an age restriction of 18.

**Note:**

- Error code 612 "Invalid Argument" will returned if any of the following is occurring:-
  - Provided Country value does not comply with the two-letter ISO-3166 country code.
  - Provided Sex value does not comply with the one-letter sex code.
  - Provided BirthDate value does not comply with the format yyyyMMdd.

**Sample Response:**

```
{
  "ResponseList": [
    {
      "PlayerId": "SamplePlayerID1",
      "Code": "0",
      "Message": "Successful."
    },
    {
      "PlayerId": "SamplePlayerID2",
      "Code": "504",
      "Message": "Player does not exist."
    }
  ]
}
```

### 3.9 Product Report (All Products except PlayTech, IM Sportbook, IM ESports)

This API returns the client report information for each product.

This API is only applicable to all products except PlayTech, IM Sportsbook, IM ESports.

**URL:** POST Report/ProductReport

**Note:**

- System only accepts hourly timestamp (Eg, 2015-01-01 00.00.00 - 2015-01-01 01.00.00). Response Code 525 will be returned if time range is invalid.
- Report date range is limit up to 31 days per request.
- As this API will take quite a while to response, recommended to call this API every hour for 1 hour data.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.
- Please note that product report is searched by the transaction date, the date time where IMOne system created the bet record (Means StartDate and EndDate parameter is searching transaction date).

**Input**

```
{
  "MerchantCode":"6657f2a9-94f3-47bb-870f-03a880481d66",
  "StartDate":"2016-10-10 00.00.00",
  "EndDate":"2016-10-10 01.00.00",
  "ProductWallet":101,
  "Currency":"CNY",
  "ReportBy":1
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>• Merchant unique ID</li> <li>• It's a required field.</li> <li>• String (50)</li> </ul>
StartDate	<ul style="list-style-type: none"> <li>• Start datetime of bet log's LastUpdatedDate</li> <li>• It's a required field.</li> <li>• Datetime yyyy-MM-dd HH.00.00 format</li> </ul>
EndDate	<ul style="list-style-type: none"> <li>• End datetime of bet log's LastUpdatedDate</li> <li>• It's a required field.</li> <li>• Datetime yyyy-MM-dd HH.00.00 format</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>• It's a required field.</li> </ul>

### 3.9.1 Reseller Product Report (All Products except PlayTech, IM Sportbook, IM ESports)

This API returns the client report information for each product.

This API is only applicable to all Products except PlayTech, IM Sportbook, IM ESports.

**URL:** POST Report/ResellerProductReport

**Note:**

- System only accepts hourly timestamp (Eg, 2015-01-01 00.00.00 - 2015-01-01 01.00.00). Response Code 525 will be returned if time range is invalid.
- Report date range is limit up to 31 days per request.
- As this API will take quite a while to response, recommended to call this API every hour for 1hour data.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.
- Please note that product report is searched by the transaction date, the date time where IMOne system created the bet record (Means StartDate and EndDate parameter is searching transaction date).

**Input**

```
{
  "ResellerCode": "5554-88555ssdf8565-666665dwdrtyh8wsad",
  "StartDate": "2016-10-10 00.00.00",
  "EndDate": "2016-10-10 01.00.00",
  "ProductWallet": 101,
  "Currency": "CNY",
```

```
"ReportBy":1
}
```

Property Name	Description
ResellerCode	<ul style="list-style-type: none"> <li>Reseller unique ID</li> <li>It's a required field.</li> <li>String (50)</li> </ul>
StartDate	<ul style="list-style-type: none"> <li>Start datetime of bet log's LastUpdatedDate</li> <li>It's a required field.</li> <li>Datetime yyyy-MM-dd HH.00.00 format</li> </ul>

```

**Note:**

Response may return TurnOver, ValidBet, Win, WinLoss, Commission up to 4 decimal points.

**Field Description – Summary**

Fields	Description
Provider	Refer Appendix B for Provider Code.
Currency	Currency used for the transaction.
TotalTurnover	Total bet per provider
TotalValidBet	Total amounts of bets placed per provider without tie records
TotalWin	Total win per provider
TotalWinLoss	Total WinLoss per provider Calculation = Total Valid Bet - Total Win
AveragePercentage	Average percentage per provider Calculation = (Total Win / Total Valid Bet) * 100
TotalBetCount	Number of bet per provider
TotalPlayer	Total amounts of player per provider.
TotalCommission	Total amount of commission per provider.

**Field Description – Total**

Fields	Description
TotalProvider	Number of total provider per currency
Currency	Currency used for the transaction.
TotalTurnover	Total bet per currency
TotalValidBet	Total amounts of bets placed per currency without tie records
TotalWin	Total win per currency
TotalWinLoss	Total WinLoss per currency
AveragePercentage	Average percentage per currency Calculation = (Total Win / Total Valid Bet) * 100
TotalBetCount	Number of bet per currency
TotalPlayer	Total amounts of player per currency.
TotalCommission	Total amount of commission per currency.

**Field Description – Details**

Fields	Description
Date	Daily date as per request Format: yyyy-mm-dd HH:00:00 +08:00

Month	Calendar Month as per request Format: monthyyyy
Operator	Operator / Merchant unique ID
PlayerID	Player's Login ID
EnglishName	Games English Name
Platform	Available Platform: - Desktop - Mobile - N/A
Provider	IM Provider code Refer to appendix B for the available provider code
Player	Total player per reportby selection
BetCount	Number of bet per reportby selection
Currency	Currency used for the transaction
Turnover	Bet amount per reportby selection
ValidBet	Total amounts of bets placed per reportby selection without tie records
Win	Win amount per reportby selection
WinLoss	WinLoss amount per reportby selection Calculation = Total Valid Bet - Total Win
Commission	Commission amount per reportby selection.
Percentage	WinLoss Percentage amount per reportby selection Calculation = (Total Win / Total Valid Bet) * 100

### 3.10 Daily Product Report (IM Sportbook, IM ESports)

This API returns the client report information for each product in daily request.

This API is only applicable to IM Sportsbook, IM ESports.

**URL:** POST Report/DailyProductReport

**Note:**

- System only accepts daily timestamp (Eg, 2015-01-01 - 2015-01-02). Response Code 525 will be returned if time range is invalid.
- Report date range is limit up to 31 days per request.
- This daily product report timezone is GMT – 4
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.

- Please note that daily product report is searched by the event date, the date when the event is being held

### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",

#### Response Code:

Respond Code	Respond Message
508	Invalid Product Wallet.
518	Invalid Language.
521	Invalid game code.
564	Result is NOT available for this game.
565	Invalid BetId.

#### Sample Response:

```
{
  "Code": "0",
  "Message": "Successful.",
  "Result": "xxxxxxxxxxxxxxxxxxxxxxx"
}
```

### 3.18 Player Broken Games

This API returns the list of player's broken games

This API is only applicable to PlayTech.

**URL:** POST Player/PlayerBrokenGames

#### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "ProductWallet": 102,
  "playerID": "playerID"
```

}

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>Merchant unique ID</li> <li>It's a required field.</li> <li>String (50)</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>It's a required field.</li> <li>Int</li> <li>102 = Playtech Wallet (Other product wallet code will receive Response Code 508.)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>Player's login ID</li> <li>It's a required field.</li> <li>String (25)</li> <li>Player ID length must be between 5-25 characters long.</li> <li>Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>

#### Response Code:

Respond Code	Respond Message
506	Invalid Player ID.
508	Invalid Product Wallet.
612	Invalid Argument.

#### Sample Response:

```
{
  "Code": "0",
  "Message": "Successful.",
  "Result": [
    {
      "PlayerName": "TEST1802AB",

  "RNum": 2
}
],
  "Total": {"TotalCount": 2}
}

```

### Field Description – Result

Field	Description
Playername	IMOne PlayerID
Game	Game name
ClientType	Client name
Bet	Game Bet amount
InfoBet	Info bet

JackpotBet	Jackpot bet
Remotelp	Player IP
BrokenGameType	Game Type. Value: regular, live, casino, playtech_open_platform.
Status	Broken Game Status Value: reversed, complete, waiting.
GameDate	Game Date
FinishedGameCode	Finished Game Code
FinishedGameDate	Finished Game Date
TotalCount	Total number of records

### 3.19 Player Online

This API returns the player in-game status

This API is only applicable to PlayTech.

**URL:** POST Player/playerOnline

#### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "ProductWallet": 102,
  "playerID": "playerID"
}
```

Property Name	Description
MerchantCode	<ul style="list-style-type: none"> <li>Merchant unique ID</li> <li>It's a required field.</li> <li>String (50)</li> </ul>
ProductWallet	<ul style="list-style-type: none"> <li>It's a required field.</li> <li>Int</li> <li>102 = Playtech Wallet (Other product wallet code will receive Response Code 508.)</li> </ul>
PlayerId	<ul style="list-style-type: none"> <li>Player's login ID</li> <li>It's a required field.</li> <li>String (25)</li> <li>Player ID length must be between 5-25 characters long.</li> </ul>

	<ul style="list-style-type: none"> <li>Characters allowed are number, alphabet, underscore (_) or full stop (.)</li> </ul>
--	--

#### Response Code:

Respond Code	Respond Message
506	Invalid Player ID.
508	Invalid Product Wallet.
612	Invalid Argument.

#### Sample Response:

```
{
  "Code": "0",
  "Message": "Successful.",
  "Status": "Online"
}
```

### 3.20 PT Product Report (PlayTech)

This API returns the client report for PlayTech product by hourly request.

This API is only applicable to PlayTech.

**URL:** POST Report/PTProductReport

#### Note:

- System only accepts hourly timestamp (Eg, 2020-01-01 00.00.00 - 2020-01-02 00.00.00). Response Code 525 will be returned if time range is invalid.
- Report date range is limit up to 31 days (744 hours) per request.
- Refer Section 1.3 for Concurrent Call Limit of this API.
- To query another request, merchant must wait until current request has completed.

#### Input

```
{
  "MerchantCode": "6657f2a9-94f3-47bb-870f-03a880481d66",
  "StartDate": "2015-01-01 00.00.00",

### 3.21 Free Round Bonus (NetEnt)

This section is to allow merchants/operators create Free Round Bonus for players via API.

The following APIs are applicable to NetEnt only.

#### 3.21.1 Create Free Round Bonus

This API can be used to give NetEnt free rounds to player(s) immediately, without specifying a bonus program in advance.

It can be also used for bonus type: **Normal** and **Widget**.

**URL:** POST Game/CreateFreeRoundBonus

**Input (IMSlot – NetEnt): BonusType = Normal**

```
{
  "MerchantCode": "sandboxstg",
  "BonusName": "FreeRound_Oct2019",
  "EndDate": "2019-10-29 19.12.30",
  "BonusType": "Normal"
  "Num_FreeRounds": 10,
  "BetLevel": 5,
  "CoinValueLevel": 10,
  "PlayerIds": [
    "F8cxrm6SYMB1UG6",
    "F8cxte6SEUH8NO4",
    "F8cxte6SFACQGCG"
  ],
  "GameIds": [
    "imgame23002",
    "imgame23003",
    "imgame23016"
  ]
}
```

**Input (IMSlot – NetEnt): BonusType = Widget**

```
{
  "MerchantCode": "sandboxstg",
  "BonusName": "FreeRound_Oct2019",
  "EndDate": "2019-10-29 19.12.30",
```

```

"BonusType": "Widget"
"WidgetInput": {
  "WidgetId": "game_branded_w",
  "WidgetSections": [
    {
      "Probability": 25,
      "FreeRounds": 1
    },
    {
      "Probability": 25,
      "FreeRounds": 2
    },
    {
      "Probability": 15,

---------	-----	---

**Response Code:**

Respond Code	Respond Message
0	Successful.
500	Invalid Merchant or Reseller Code.
504	Player does not exist.
507	Invalid currency.
521	Invalid Game Code.
540	Player was not created successfully or inactive at provider side.
998	System is currently unable to process your request. Please try again.
569	Characters exceeded length allowed.
570	Invalid End Date.
571	Invalid Number of Free Rounds.
572	Invalid Bet Level.
573	Invalid Coin Value Level.
575	Invalid Widget Input.
576	Free round bonus creation failed.

**Sample Response (All success):**

```
{
  "Code": "0",
  "Message": "Successful.",
  "Result": [
    {
      "PlayerId": "F8cxrm6SYMB1UG6",
      "Status": "Success"
    },
    {
      "PlayerId": "F8cxte6SEUH8NO4",
      "Status": "Success"
    },
    {
      "PlayerId": "F8cxte6SFACQGCG",
      "Status": "Success"
    }
  ]
}
```

### Sample Response (Mixture of status):

```
{
  "Code": "0",
  "Message": "Successful.",
  "Result": [
    {
      "PlayerId": "F8cxrm6SYMB1UG6",
      "Status": "Success"
    },
    {
      "PlayerId": "F8cxte6SEUH8NO4",
      "Status": "Failed"
    },
    {
      "PlayerId": "F8cxte6SFACQGCG",
      "Status": "Success"
    }
  ]
}
```

### Sample Response (All failed):

```
{
  "Code": "576",
  "Message": "Free round bonus creation failed.",
  "Result": [
    {
      "PlayerId": "F8cxrm6SYMB1UG6",
      "Status": "Failed"
    },
    {
      "PlayerId": "F8cxte6SEUH8NO4",
      "Status": "Failed"
    },
    {
      "PlayerId": "F8cxte6SFACQGCG",
      "Status": "Failed"
    }
  ]
}
```

### 3.21.2 Get Active Free Round Widgets

If merchant/operator would like to create free round bonus via widget (Bonus Type – Widget), this API is required to be triggered first, in order to obtain the information from NetEnt about all active widgets; that is, widget ID, name, and number of sections.

**URL:** POST Game/GetActiveFreeRoundWidgets

#### Input (IMSlot – NetEnt)

```
{
  "MerchantCode": "sandboxstg",
  "ProductWallet": 101,
}
```

Name	Mandatory	Description
MerchantCode	Yes	<ul style="list-style-type: none"> <li>String (50)</li> <li>Merchant unique ID.</li> </ul>
ProductWallet	Yes	<ul style="list-style-type: none"> <li>Integer</li> <li>101 = IM Slot Wallet (Other product wallets will receive Respond Code 508)</li> </ul>

#### Response Code:

Respond Code	Respond Message
0	Successful.
508	Invalid Product Wallet.

#### Sample Response:

```
{
  "Code": "0",
  "Message": "Successful.",
  "ActiveFreeRoundWidgetsList": [
    {
      "WidgetId": "default_w",
      "NumberOfSections": 6,
      "WidgetName": "Default Widget"
    },
    {
      "WidgetId": "game_branded_w",
      "NumberOfSections": 6,
      "WidgetName": "Game Branded"
    }
  ]
}
```

```
]
}
```

## 4. Game Launch

This section outlines all Game Launch API calls, parameters and responses.

**Note:**

Subject to provider supported currency, in the event the Game Launch API is triggered for non-supported currency, error will be thrown.

### 4.1 IMOne Game API (All Products)

Merchants/Operators are required to call this API before letting the player to launch the IMOne Games. This Game API allow player to launch mobile game without required Domain validation.

This API is applicable to all products.

**URL:** POST Game/NewLaunchGame

**Input (not all parameters are applicable to all product wallets, refer description below for more detail)**

```
{
  "MerchantCode": "i6657f2a9-94f3-47bb-870f-03a880481d66",

## Appendix

### Appendix A: Product Wallet Code

Product Wallet	Code (Int)	Remark
MWG Fishing Wallet	2	
IM Slot Wallet	101	
PlayTech Wallet	102	
IM Live Dealer Wallet	201	For IDR and VND currency of this wallet, they are multiplied by a constant of 1000. For example, when 1 IDR and 1 VND transfered to this wallet, they are 1000 IDR and 1000 VND in actual value.
IM Sportsbook Wallet	301	For IDR and VND currency of this wallet, they are multiplied by a constant of 1000. For example, when 1 IDR and 1 VND transfered to this wallet, they are 1000 IDR and 1000 VND in actual value.
IM ESports Wallet	401	For IDR and VND currency of this wallet, they are multiplied by a constant of 1000. For example, when 1 IDR and 1 VND transfered to this wallet, they are 1000 IDR and 1000 VND in actual value.
IM Lottery Wallet	501	For VND currency of this wallet, they are multiplied by a constant of 1000. For example, when 1 VND transfered to this wallet, they are 1000 VND in actual value.
IG Lottery Wallet	502	
VR Lottery Wallet	503	
SG WIN Lottery Wallet	504	
Le You Gaming Wallet	602	
Kai Yuan Gaming Wallet	603	
VG Gaming Wallet	604	
MeiTian Gaming Wallet	606	
SG Win Gaming Wallet	607	
Lucky Gaming Wallet	609	
IM Gaming Wallet	610	
Bole Gaming Wallet	611	
IM Gamezone Wallet	702	
IM Casino Wallet	801	

**Note:**

- Although IM Sportsbook Wallet and IM ESports Wallet has different Code, they are actually sharing the same Product Wallet (i.e fund transfer and betting activity for the 2 products will add to/deduct from the SAME product wallet balance.
- All wallet currencies are in unit of 1 (i.e. multiplied by a constant of 1), unless it is mentioned otherwise. For example in IM Live Dealer Wallet, VND and IDR are multiplied by a constant of 1000., instead of 1.

## Appendix C: Note for Operator Wallet Integration

Operator Wallet model refers to the business model where Operator will host player balance (wallet) and the balance is used directly for bet placement, without need to perform fund transfer to IMOne in first place.

IMOne supports Operator Wallet model. However, please take note the following:

1. The following products do NOT support Operator Wallet model:

- MWG Fishing
- PlayTech
- IM Sportsbook
- IM eSports
- IG Lottery
- VR Lottery
- SG WIN Lottery
- Le You Gaming
- Kai Yuan Gaming
- VG Gaming
- MT Gaming
- SG WIN Gaming
- Lucky Gaming
- IM Gaming
- Bole Gaming
- IM Gamezone
- IM Casino

Operator is required to perform fund transfer to the respective product wallet for the abovementioned products.

2. The following APIs are NOT applicable to Operator Wallet Integration:

- 2.4 Fund Transfer
- 2.4.1 Check Transfer Status
- 2.5 Get Player's Current Balance

The following Respond Code will be returned if Operator (who subscribes to Operator Wallet) passes in Operator Wallet Product Code:

Respond Code	Respond Message
508	Invalid Product Wallet.

## Appendix D: Potential GetBetLog Delay Time

Due to various reasons, some providers may have a potential of additional delay time from the mentioned time in section 2.6.

Below is a list of potential delay time for each provider:

Product Wallet	Provider	Provider Code	Potential Delay Time
102	PT	N/A	Up to 15 minutes
101	TTG	TOPTRENDGAME_SLOT	Up to 15 minutes
101	PRG	PRAGMATIC_SLOT	Up to 15 minutes
101	SPG	SPADEGAMING_SLOT	Up to 15 minutes
101	RT	REDTIGER_SLOT	Up to 15 minutes

## Appendix E: Guide on how to retrieve IM Sportsbook and IM ESports Bet Log

### 1. Every 10 minutes

Call GetBetLog requests with the following parameters:

- MerchantCode = <your merchant code as provided by IM>
- StartDate = now – 7 days
- EndDate = now
- Page = 1 (If Response's TotalPage is more than 1, repeat calling GetBetLog (for next page) until Page == TotalPage).
- Product Wallet = either 301 or 401
- DateFilterType = 1
- BetStatus (optional)
- LastUpdatedDate = now – 15 minutes
- Language = <your preferred language>

10 minutes interval is just a recommendation. Operator can decide your preferred interval.

#### Explanation

1. By setting the filterType = 1, you are always retrieving the bet log based on bet time.
2. By setting StartDay = now – 7 days and EndDate = now, you get all the bets that created or updated in the past 7 days.
3. To avoid keep getting redundant bets, you should set **LastUpdatedDate** = now – 15 minutes. By running the job every 10 minutes, it only retrieves any new bet or updated bet between 15 minutes to 5 minutes ago. This also has catered the possibility of the available bet log delay up to 5 minutes.
4. BetStatus is optional. If you intend to retrieve only settled bet, you may set BetStatus = 1. If you intend to retrieve both unsettled/settled bet, there is no need to pass in this parameter.
5. For the first time of running this job (if some bets have been placed), you may obsolete the **LastUpdatedDate** parameter, so that you get all bets for the first time. Thereafter, please input **LastUpdatedDate** parameter.

### 2. Once/Twice per day

Call GetBetLog requests with the following parameters:

- MerchantCode = <your merchant code as provided by IM>
- StartDate = Today – 7 days
- EndDate = Today
- Page = 1 (If Response's TotalPage is more than 1, repeat calling GetBetLog (for next page) until Page == TotalPage).
- Product Wallet = either 301 or 401
- DateFilterType = 2
- BetStatus (optional)
- LastUpdatedDate = yesterday

- Language = <your preferred language>

#### Explanation

1. By setting the filterType = 2, you are always retrieving the bet log based on event time. This ensures you get all the bets that settled or resettled in the past 7 days.
2. By setting StartDay = Today – 7 days and EndDate = Today, you get all the bets that created or updated in the past 7 days.
3. To avoid keep getting redundant bets, you should set LastUpdatedDate = now – 1 days. By running the job once/twice per day, it only retrieves any updated bet since yesterday.
4. BetStatus is optional. If you intend to retrieve only settled bet, you may set BetStatus = 1. If you intend to retrieve both unsettled/settled bet, there is no need to pass in this parameter.

## Appendix F: Two-letter ISO-3166 Country Code (NetEnt)

Country	Country Code
China	CN
United State of America	US
United Kingdom	GB
Japan	JP
Malaysia	MY
Thailand	TH
Vietnam	VN
Indonesia	ID
Korea	KR

Please refer to [https://en.m.wikipedia.org/wiki/ISO\\_3166-1\\_alpha-2](https://en.m.wikipedia.org/wiki/ISO_3166-1_alpha-2) for more country codes.
